

Langhe D.O.C. Favorita

Vineyard

The cultivable area, mostly composed of sandy limestone soil, is generally located on the South/East side of the territory

Grape Variety

100% Favorita

Production

The very limited production in this area makes it a rare and precious wine on our sun-exposed hills, where the grapes ripen intensely and vibrantly. Fermentation takes place in stainless steel barrels at a controlled temperature

Characteristics

The wine possesses a strong personality, and its characteristics make it versatile for any occasion. It has a pale straw yellow color; its delicate aroma is pleasing to the sense of smell, while its melodious and fresh flavor leaves a pleasant smoothness in the mouth

Pairings

Ideal as an aperitif, it pairs well with vegetable-based soups and risottos, fresh cheeses, steamed fish, and shellfish sauce
